## Health Information Technology A.A.S.

The Health Information Technology program, administered by the Allied Health Sciences Department, equips students with the competencies to use manual or computerized health information systems that collect data for analyzation, interpretation and dissemination to physicians, patients, public/private agencies, and other health care facilities. Health information maintained within the manual or electronic files can be used for quality assurance, subsequent patient care, medical research, financial reimbursement and legal purposes. Upon successful completion of the program requirements, students receive the Associate of Applied Science (A.A.S.) degree and are eligible for the certification examination offered by the American Health Information Management Association.
