

Recording a video using your Mac

If you are asked to record a video and have a Mac, please take a moment to review these instructions for better results

App: Use the Mac app "Photo Booth" →

It will open like this:

When recording:
Straight on, not angled:

NO

YES

Less busy backgrounds better
than busy...

Good light **Good background**
Busy background **Too much shadow**

...then make sure to balance
the light for less shadow

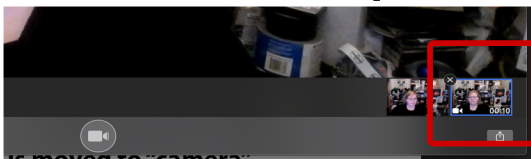

Change to video

You will need to change the
setting to video by clicking on
this icon: 

When you have finished recording
and have a file you want to save,
you will need to Export it.

Select the clip

Then either right click or go
to "File" on the upper left side and
select Export
