Meeting began at 2:00pm

- can we get some information behind the decision making process for remote learning in the fall
- what is the breakdown for enrollment from program to program/dept to dept across the college
- are virtual sessions going to be a deterrent if other colleges are going to be in person in the fall
- can we get Lisa Kasper in next semester to give us a report on how we are doing
- want some information on late start semester vs. on time semester
- can we have access to the data about the surveys that went out and offered us info about student and faculty preferences about teaching remotely
- we want the process behind the decision to be public and be able to be spoken back to
- communication around fall 2021 is terrible
- who's purview does the credit no credit policy fall under
- the way these big decision are happening for our students feels patchwork, personality driven way to get things done which isn't really actionable

Meeting adjourned at 3:15pm
